2018 RSS ANNUAL MEETING
CALL FOR PAPERS, POSTERS, AND ORGANIZED SESSIONS

2018 Annual Meeting of the Rural Sociological Society
Portland, Oregon  July 26-29, 2018

MEETING THEME: Science in Society, Society in Science – Toward a 21st Century Model for Social Scientific Research

Growing public skepticism about the value of science and expert knowledge has been a defining characteristic of the early 21st century. Critiques of science come from many sources – populist anti-elite social movements, academic studies of conventional scientific methods and institutions, and advocates for a more participatory approach to knowledge production. As the distinction between ‘facts’ and ‘values’ has become blurred, the evidence-base that informs current policy becomes increasingly contested territory. Notably, social scientists have long relied on evidence and scientific research to challenge popular misunderstandings of social problems like poverty, crime, racism, and sexism. At the same time, they have been at the forefront of critiques of the mainstream scientific enterprise and helped pioneer new approaches to research and engagement.

Professional social science societies (like RSS) have an obligation to support those who are studying and developing effective responses to the challenges faced by rural people and places in a globalized world. New models for scientific research will be increasingly important if our efforts are to inform public discourse and shape the development of effective public policies. To do this, we need to reconcile tensions between the desire to retain the power and insights of rigorous scientific methods, and our awareness of the societal biases associated with conventional scientific institutions. At the 2018 Annual Meetings of the Rural Sociological Society, we particularly encourage attendees to present work that explores this vexing and enduring issue, and to provide examples of innovative approaches to applied scientific research on rural topics.

Over the last 80 years, the annual meetings of the RSS have been a venue for the exchange of ideas and information about a wide range of rural issues. Our attendees include faculty and students from
presentations of research and engagement focused rural people, places and themes from a wide range of disciplinary perspectives.

**Abstracts:** Abstracts should be approximately 350-500 words and briefly outline the purpose and theoretical framing of the paper, poster, program, or organized session. Where appropriate, include information about methods, data, and preliminary findings. The deadline for submitting papers, posters and sessions is **Thursday, February 1, 2018, 11:59 pm (EST).**

New Book Announcements

Water Crises and Governance critically examines the relationship between water crises and governance in the face of challenges to provide water for growing human demand and environmental needs. Water crises threaten the assumptions and accepted management practices of water users, managers and policymakers. In developed and developing world contexts from North America and Australasia, to Latin America, Africa and China, existing institutions and governance arrangements have unintentionally provoked water crises while shaping diverse, often innovative responses to management dilemmas. This volume brings together original field-based studies by social scientists investigating water crises and their implications for governance. To purchase, see [http://www.palgrave.com/us/book/9781137592453](http://www.palgrave.com/us/book/9781137592453).

This volume explores the contents, forms, and actors that characterize current opposition to the corporate neoliberal agri-food regime. Designed to generate a coherent, informed and updated analysis of resistance in agri-food, empirical and theoretical contributions analyze the relationship between expressions of the neoliberal corporate system and various projects of opposition. For a full description, click [https://www.amazon.com/Resistance-Neoliberal-Agri-Food-Regime-Agriculture/dp/1138723371/ref=sr_1_3?s=books&ie=UTF8&qid=1512718756&sr=1-3&keywords=alessandro+bonanno](https://www.amazon.com/Resistance-Neoliberal-Agri-Food-Regime-Agriculture/dp/1138723371/ref=sr_1_3?s=books&ie=UTF8&qid=1512718756&sr=1-3&keywords=alessandro+bonanno).

This book proposes a theory of the legitimation crisis of neoliberalism. Through analyses of the legitimation crisis of regulated capitalism and the characteristics and theories of neoliberalism, the author contends that neoliberalism is affected by crises of system and social integration. The crisis of system integration refers to the inability of market mechanisms to address problems of capital accumulation and social stability. The crisis of social integration refers to the unmet promises of economic growth and social well-being. While attempts to address these crises are carried out through state intervention, crisis resolutions are inadequate due to the limits of the free market system and current state forms. For full description, see [http://www.palgrave.com/us/book/9781137592453](http://www.palgrave.com/us/book/9781137592453).

CALL FOR PAPERS

Call for Papers - Landscape Education: Research and Practices

As the concept of landscape is becoming increasingly popularised and democratised (Jorgensen et al., 2015; Egoz et al., forthcoming), it has also gained a renewed role in the educational context, where it can be seen both as a didactic object and a pedagogical instrument. Scholars are engaged in exploring the implications and consequences of educating on, for and through the landscape by using concepts such as ‘landscape literacy’ (Spirm, 2005; Castiglioni, 2009), ‘landscape awareness’ (Butler and Åkerskog, 2014) or ‘médiation paysagère’ (Davodeau and Toulblanc, 2010). Moreover, understanding the physical and social determinants of the landscape and being able to recognise the various perceptions and meanings attached to it are paramount in terms of acting appropriately and responsibly for its sustainable protection, management and planning, as recognised by the European Landscape Convention (Article 6a, 6b). Besides the technical and professional side, if is therefore important to also consider the primary stages of education as well as all the non-formal forms of education addressed to citizens...
